

1143 Unit 3 – Homework 3

In this assignment you will create a web page about your favorite TV show of all-time and link it to an external style sheet to apply a few CSS rules to it. Follow the steps below to complete the assignment.

1. Create an external style sheet using a text editor of your choosing. In the CSS file add the following style rules:
 - a. Entire document should have a black background color
 - b. All text color on the page should be white
 - c. All heading elements should have a background color of red
 - d. All paragraph elements should have a font size of 16px
 - e. Create a class to make only `` elements that are descendants of a `` element appear bold
2. Save this style sheet as `styles.css`
3. Create a web page about your favorite TV show using the HTML 5 template as a starting point. The web page should be linked to the `styles.css` style sheet. The web page needs to have the following content:
 - a. The show name in a `<h1>` tag
 - b. The number of seasons the show ran, or has currently completed in a `<h3>` tag
 - c. A description of the show in a paragraph
 - d. A div with the class you created above that contains an unordered list of the show's lead actors
 - e. A hyperlink to a site about the show
 - f. At the bottom of the page include an email hyperlink to your email address
 - g. Somewhere in your code place an HTML comment with your name, assignment name, and date
4. Save this web page as `tvshow.html`
5. Once finished creating these two files, log in to your citWebDev account using FileZilla.
6. Create a new folder within the `public_html/csci1143/` folder named `hw3`.
7. Upload both the CSS file and HTML file to the `public_html/csci1143/hw3/` folder.
8. Submit the complete URL of this work to this Blackboard assignment in the "Submission" text field.
9. A correctly formatted URL should look like `http://citwebdev.csc.ccc.edu/~username/csci1143/hw3/` where **username** is your CSCC username.
